Shimmering Metallic Thread for Sparkling Embroideries

Brilliant, shimmering effects in glamorous gold and silver tones are guaranteed by using the proven METY metallic embroidery thread. 30 »coloured« shades add sparkle to any project – for fantastic embroideries in gleaming colours. It adds a stylish touch to everything, from clothing to home textiles or precious accessories!

GUNOLD®

Processing Recommendations:

- ◆ **Thread Tension:**
As for all metallic threads, a loose thread tension is extremely important.
- ◆ **Thread Unwinding:**
Make sure to slip the provided thread net over the cone before you start embroidering. This will guarantee even thread unwinding.
- ◆ **Needle:**
Use universal needle Organ 75/11 SES or special needle for metallic threads Organ 775 in case of difficulties.

- ◆ **Bobbin Thread:**
For best results, use BOBBY SYN 120 or 130.
- ◆ **Design:**
Best effects can be achieved in large-scale patterns, but it's also suitable for very fine embroideries.

Care Instructions:

Technical Information:

- ◆ **Item No. 1411 + Colour Number**
- ◆ **Upper thread**
- ◆ **Material**
Metal-coated polyester/polyamid thread
- ◆ **Strength: 7/2 = Nm 66; dtex 152 and 5/2 = Nm 49; dtex 206**

Product Range – Upper Threads

SULKY	Viscose thread made of 100% ENKA viscose, with a silky smooth shine, available in more than 300 colours!
GLITTER	Glittery foil yarn for shiny and metallic effects.
POLY	Extremely durable yarn made of 100% polyester, highly tear and rub resistant, plus colourfast to chlorine – ideal for working clothes and all heavily-strained items.
COTTY	100% cotton – available in different strengths. Perfect for giving your projects the typical needlework touch!
FILAINE	Embroidery thread made of 100% acrylic, but with a higher degree of tear and rub resistance than wool embroidery threads. Looks like »handstitched«!
MONO	The »transparent« monofilament thread made of 100% polyester – for transparent embroideries and for attaching sequins and ribbons.
SOLAR	Colour-changing polyester yarn: The white yarn changes colour into one of 7 different tones available in natural or artificial UV light.
GLOWY	Thread made of 100% polyester that glows in the dark. The thread absorbs natural or artificial light making it fluorescent in the dark – the well-known disco effect!
FLUOR	Thread made of 100% polypropylen that absorbs natural or artificial light, with a yellow-green fluorescence in the dark.

Professional materials for high-quality embroidery results – tried and tested in the clothing, promotion and home textile industries. For more information visit our website www.gunold.de!
